

University Certificate in Child Safety on the Internet

Training for teachers, education and child services professionals to enable them to promote safe and responsible use of internet and mobile technologies and services.

CERTIFICATE AIMS

- Introduce the range of activities and behaviours which Information Communication Technologies (ICTs) enable children and young people to engage in online
- Recognise the psychological and social risks associated with children and young people's use of ICTs
- Develop an understanding of the legal and technical prevention and protection tools available to enhance child safety on the Internet
- Develop the skills necessary to communicate with children and young people about the risks and opportunities associated with their use of ICTs

WHO IS IT FOR ?

It's for everyone, not just the IT specialists.
The course is open to teachers, education and child services professionals.

WHO WILL PROVIDE THE TRAINING?

The Cyberspace Research Centre, based in the Department of Forensic and Investigative Science at the University of Central Lancashire.

HOW LONG DOES THE CERTIFICATE TAKE?

The certificate consists of 120 hours delivered over 14 weeks via e-learning at the University of Central Lancashire.
